MEMORANDUM TO: Mr. Robert Cutler
FROM: Office of Current Intelligence

The red check marks on Items 5, 6 and 9 indicate the items which we believe warrant being brought to the attention of the White House when and if an opportunity arises to brief the President on current intelligence items. We do not believe there is urgency with respect to these three items and as occurred on Wednesday evening, 4 February, any item indicating immediate action will be handled direct and prior to its being published in the Current Intelligence Bulletin.
